

UNIQ[®]

AUTOMATIC CONTROL SYSTEM

Talk to an Account Manager about the UNIQ Automatic Control System and how it works with the SSQ II[™] MultiPro Roof Panel Machine!

FEATURES OF THE UNIQ[®] AUTOMATIC CONTROL SYSTEM

Improved user interface on 7" touchscreen with troubleshooting screens, accessibility to coil calculator, controller settings, length calibration, and more.

Automatic or manual operation of your machine and shear either through the touchscreen connection or the manual push-button control panel.

USB port for program updates and to import a 600-panel length cutlist and export final project specifications.

Easy to use system comes permanently mounted to your machine.

Interactive pop-up error messages for easy and quick troubleshooting of your own machine.

*Currently only available with new SSQ II MultiPro Roof Panel Machine purchases.
